

Q1. Make a student registration and Update, delete, view data after registration and data fill up?

The image displays four screenshots of a mobile application interface for student management, arranged in a 2x2 grid. Each screenshot shows a 'Student Details' form with input fields for 'Enter Rollno:', 'Enter Name:', and 'Enter Marks:'. Below the form are buttons for 'UPDATE' and 'VIEW'. At the bottom of each screen is a numeric keypad with digits 1-9, 0, a decimal point, and a backspace key.

- Top Left Screenshot:** Shows an 'Error' message box with the text 'Invalid Rollno'.
- Top Right Screenshot:** Shows the form with 'Enter Rollno:' set to 25, 'Enter Name:' set to 'saptarshi Chatte', and 'Enter Marks:' set to 45. It includes 'INSERT' and 'DELETE' buttons.
- Bottom Left Screenshot:** Shows a 'Success' message box with the text 'Record added'.
- Bottom Right Screenshot:** Shows an 'Error' message box with the text 'Please enter Rollno'.

## Q2.Splash Screen

So Sir I am working for a project so made that apps splash screen ok..

Ans:

```
<?xml version="1.0" encoding="utf-8"?>
<FrameLayout xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:tools="http://schemas.android.com/tools"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    android:background="@drawable/img2"
    tools:context=".SplashScreen"
    >

    <ImageView
        android:id="@+id/logo"
        android:layout_width="match_parent"
        android:layout_height="match_parent"
        android:layout_centerInParent="true"
        android:src="@mipmap/ic_launcher_foreground" />

</FrameLayout>

<?xml version="1.0" encoding="utf-8"?>
<RelativeLayout xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:app="http://schemas.android.com/apk/res-auto"
    xmlns:tools="http://schemas.android.com/tools"

    android:id="@+id/BACK"

    android:layout_width="400sp"
    android:layout_height="400sp"
    android:layout_gravity="center"
    android:background="@drawable/logo"

    tools:context=".MainActivity" />
```

## Manifest:

```
package com.example.splashscreen;
